

HEALTH
SERVICES

Whereas the College does not operate or maintain a health center, and whereas there are several first aid kits available throughout the campus, it is the policy of the college that anything other than a very minor injury should be treated at a clinic or nearby hospital.

Except in cases of severe illness or medical emergencies, students are considered mature enough to seek appropriate relief. To seek help or not to seek help is a decision of personal responsibility.

HEALTH
EDUCATION

Whereas the College does not operate or maintain a health center, the Counseling and Career Center is responsible for providing information on HIV, Bacterial Meningitis, and other health issues, as appropriate.
